

INTRODUCING AUTOMOTIVE HIGH SPEED DATA CONNECTORS WITH PERFORMANCE UP TO 6GBPS

- Supports up to 6 Gbps
- Compatible with existing automotive standard interfaces

TE Connectivity's (TE) manufactures fully shielded HSD and HSL connector systems supports up to 6 Gbps and 1Gbps respectively, accommodating different wire types and sizes. Compatible with LVDS, Ethernet and USB protocols, it features a full range of headers and connectors for unsealed and sealed applications. Both HSD and HSL products have been designed specifically for automated manufacturing and benefit from TE Connectivity's (TE) truly global manufacturing footprint.

KEY FEATURES AND BENEFITS

- Fully shielded connector system for different wire sizes and types
- Compatible with LVDS, Ethernet and USB protocols
- Full range of connectors for unsealed and sealed applications
- Extensive PCB header portfolio
- High level of process automation and global manufacturing footprint
- IDB 1394 automotive specification

APPLICATIONS

- Legacy Infotainment
- Dashboard/Touch Screens
- HD Screens
- Bluetooth
- USB Connections
- Dual Band WIFI
- Surround Cameras
